## CAREER GOALS

I'm striving for a developer position that will strengthen my current skills and challenge me to grow a new, robust set of knowledge about software, business, and innovation. In the long term, I aim to take on a leadership role as a PM or software engineer.

## EDUCATION

*B.S. Computer Science and Engineering* GPA – 3.846  
University of Colorado, Denver May 2014

## TECHNICAL SKILLS

C++	Java	Ruby On Rails	SQL	Linux	Git	Android	
Python/Jython		Javascript	HTML	CSS	XML	Agile	TDD

## EXPERIENCE

ZERISTA April 2013 - Present

*Ruby on Rails Intern – Full-stack web developer*

- Customized the Zerista event application to suit client needs and constraints.
  - Wrote hundreds of migrations to update the application's database.
  - Modified subdomain Rails views & styles to achieve customer's unique goals.
- Extended the administrative CMS to provide additional functionality.
- Identified, investigated and resolved critical bugs within the application.
- Weekly product testing – well known as being the most thorough tester!

ENODIA FINANCIAL TECHNOLOGY June 2012 – December 2012

*Jr. Java Developer*

- Developed real-time, server-side financial reporting software utilizing the FIX protocol in compliance with the Dodd-Frank Wall Street Reform Act of 2010.
- Developed trade reporting technologies for the London Stock Exchange's Turquoise trading group under similar reporting requirements.
- Maintained legacy code by providing additional functionality, patching fatal bugs, and redesigning outdated work-flow models.

## PERSONAL STATEMENT

Through hard work and perseverance, I have earned the knowledge and experience required to succeed as a software developer, leader, and problem solver. I am passionate about my new career and I'm driven to prove my value.

I also play mandolin, collect art, obsess over science, and love the mountains.
