CAREER GOALS

I'm seeking a developer position that will expand my understanding of good engineering practices and challenge me to grow a robust set of knowledge about software, business, and innovation. My long-term ambition is to be in a leadership role.

EDUCATION

B.S. Computer Science and Engineering   GPA – 3.846
University of Colorado, Denver   May 2014

TECHNICAL SKILLS

C++	Java	Ruby On Rails	SQL	Linux	Git	Android	
Python	Jython	Javascript	Markup Langs		CSS	Agile	TDD

EXPERIENCE

ZERISTA   April 2013 – March 2014
Ruby on Rails Developer

Experience with the popular web application framework has been a success, challenging me to learn a complex system, largely under my own guidance.

- Updated the application database through hundreds of migrations.
- Customized sub-domain Rails views & styles to meet deliverable requirements.
- Extended the administrative CMS capabilities to simplify business processes.

ENODIA FINANCIAL TECHNOLOGY   June 2012 – December 2012
Jr. Java Developer

My first position as a developer has shaped my values concerning good software design and taught me how to overcome uncertainty while producing quality outputs.

- Developed real-time, server-side financial transaction reporting software in compliance with international standards required by the Dodd-Frank Act of 2010.
- Maintained legacy code for Smart Order Routing by providing additional functionality, patching fatal bugs, and redesigning outdated work-flow models.

PERSONAL STATEMENT

While simultaneously working and attending school, I have earned the knowledge and experience required to succeed as a software developer, leader, and problem solver. I am passionate about having a rewarding career and I'm driven to prove my value.
